

# The TRASH RAT!

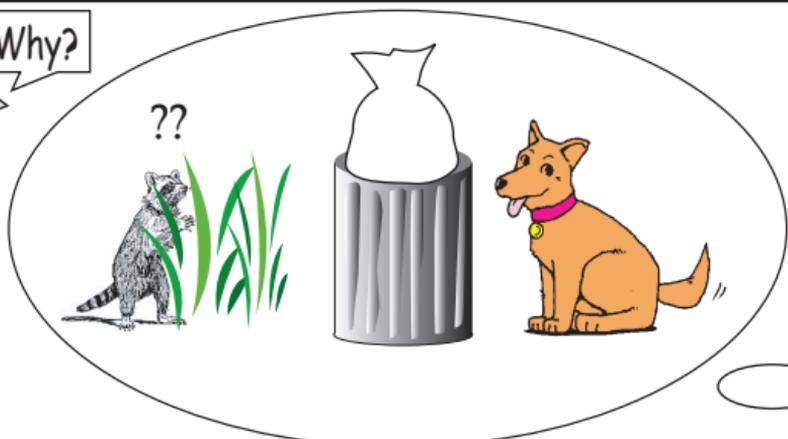

© 2009 by Chris Izzi

Hey Trash Rat, what are you doing?

Retrofitting the new Foster dog tags I designed with microtransmitters.

Why?

Because dogs always know where to find the best garbage! Now I will too!

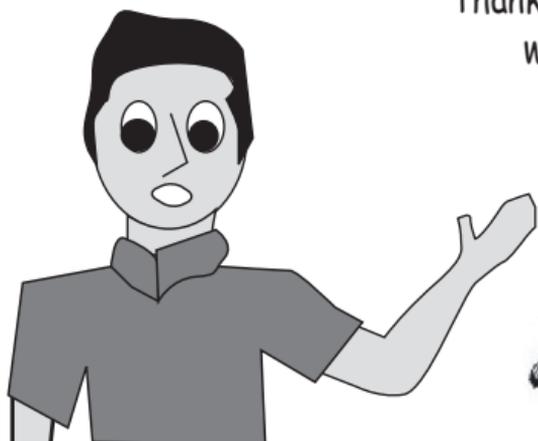

Then what will you do?

Spread it around!  
Who doesn't love a roadside covered with trash?

Don't let this happen! Use trash receptacles with locking lids to keep the animals out.

Thank you to everyone who helps with roadside cleanups, and thanks also to all those who don't litter.

**A Message From The Foster Conservation Commission**
