

COMING SOON!

The Town recognizes that our current website is outdated and difficult to manipulate. Some elements, such as the Calendar feature, were created in a program that no longer exists, with no reasonable substitute or means to delete the old one.

The Town Clerk, Treasurer and Department heads, with support from the Council President, Police Chief and others, have been working for the last few months to solidify content and design of a new web site that will:

- Be easier for Town staff to update.
- Provide information in a more accessible way, with multiple ways to find the same topic – because we know that no two people think the same way.
- Provide dynamic content.
- Act as a resource with helpful links to useful services.
- Include a notification/alert system that residents can sign up for, with the ability to “opt out”.

Shown here is the new design for our website home page. The image shown is a place holder - we will, of course, be replacing the photograph you see here with an image from Foster!
